

# WE NEED YOUR HELP!

HBSF's fleet of 36 sabots is over 40 years old and often in need of repair. As a result, each year almost 20% of the foundation's budget is spent on maintaining and repairing those boats, their sails and rigging. Hours of volunteers' time are required just to get the boats seaworthy enough to send students out on the water safely. Many of the boats' sails have rips that are sealed with duct tape! Our three 25-year old Boston Whaler instructor chase boats are often out of service due to mechanical problems.

To improve and continue a successful sailing program, new and better equipment is necessary. Acquiring racing sabots and larger two-person sail boats will keep kids involved in our program as they grow older and help develop advanced sailing skills.

You can help by becoming a sponsor of our Capital Fund Raising Campaign. The campaign's goal is to raise at least \$150,000 from caring organizations and individuals like you. Your kind donations will allow us to:

- Replace the entire aged fleet of sabots with 36 new Naples sabots
- Acquire racing sabots for advanced students
- Purchase a new Lido 14 or Harbour 20 two-person sail boat
- Refurbish, upgrade or replace the coach boats
- Fund an endowment for scholarships for military, underprivileged, and handicapped children

You can make a real difference! Give generously to this worthy cause. And help give the kids a gift of a lifetime – the chance to learn to sail. (No funds raised in this campaign will be used for operating expenses.)

Our new sabots will be manufactured by W.D. Schock Corp. here in Southern California and acquired under a fleet discount program.

**OUR PROGRAM:** Since 1969, the Huntington Harbour Yacht Club has provided summer sailing programs for children age 6 to 18. In 2009, the Yacht Club formed the Huntington Beach Sailing Foundation as a 501(c)(3) non-profit charitable organization in order to expand its programs and solicit public contributions. With public financial support, each summer HBSF provides tuition free sailing lessons to children from economically disadvantaged backgrounds, with physical handicaps or from military families with a parent deployed overseas.

**NAPLES SABOT:** The first Naples Sabot was designed and built by Roy McCullough and R.A. Violette in a garage in 1946 during WWII. This single-sail, dinghy-style boat is 8 feet long, is made of plywood and/or fiberglass, weighs about 80 pounds and uses a lee board instead of a keel. The Naples sabot has become the premier boat in Southern California for the training of young sailors. Junior regattas divided into levels from Class C beginners to Class A advanced racers are held annually up and down the coast. HBSF student sailors compete each summer in two of these events -- the "Beach-to-Bay" in Long Bay and the "Dutch Shoe" in San Diego.
